

FP-iLift Floating iPad Display Arm

Product Description and Features:

Works with iPad, iPad 2 & iPad with Retina display.

The FP-iLift can position your tablet exactly where you want it; with fingertip control of both vertical and horizontal movement. The integral spring arm renders the monitor weightless.

The arm can fold to fit in about 3" of space and extend up to 16".

Comes standard with Quick-Release head.

Weight range 2-5 lbs.

Arm rotates 360° at 3 joints.

Machined from Billet Aluminum, making it very strong but still lightweight.

High-tech aesthetic complements both the iPad and the console.

Works on all TBC Trac-Series consoles.

Typical Applications:

IntelliTrac front Trac, SmartTrac, SmartCart, Producer and Client tables.

Optional secured holder shown below:

Std. Quick-Release head:
